

## Environmental Policy

As lithographic printers Zenith Media recognises the impact that our operations have on the environment. We are committed to making continuous improvements by taking practical steps to minimise any negative effects our processes may have. As a result of our Environmental Management System we are reducing our impact by recycling 100% of our waste that is suitable for recycling and using ISO 14001 accredited companies to collect and manage the waste. We also promote efficient use of resources such as electricity, gas and water. These resources are also monitored on a monthly basis to calculate our CO<sub>2</sub> emissions.

We are also committed to the prevention of pollution and demonstrate environmental improvement through:

- Complying with all relevant legislation and other environmental codes of practice to which the company subscribes.
- Developing objectives that target environmental improvements and monitor performance through regular review.
- Developing a relationship with suppliers, contractors and other interested parties so that we all recognise our environmental responsibilities.
- Improving staff awareness so that they carry out their activities in an environmentally responsible manner in accordance with company policy.

Our environmental policy is reviewed twice a year at our management review meetings. This ensures it is kept accurate and in line with the companies targets and objectives. This policy is available to all interested parties on request and for download from our web site.
